

## WOVEN 20-HDX

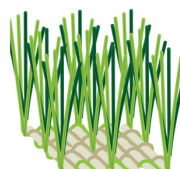

### Turfscapes's Woven

Turfscapes Woven is designed for landscape use and consists of a blend of polyethylene fiber with a thatch zone in a woven system. The interlocked fibers create unparalleled grass yarn retention and excellent pile resiliency that resists matting. The system provides high water permeability features that is unmatched by traditional tufted products.

### Product Specifications

Production Method:	Woven Interlocked
Yarn:	Polyethylene Monofilament with PP Thatch
Pile Weight:	36.87 oz/sy
Film Type:	Olive Green Blend and Dual Color Thatch
Knots:	29,660 sy (24,800/sm)
Filaments	563,551 sy (471,200/sm)
Pile Height	0.79" (20mm)
Secondary Backing:	Acrylic
Width Length	13.1" (4 m)
Roll Length	82.021' (25 m)
Drainage	Material is Porous

Xtreme Fiber Lock

Xtreme Drainage

Xtreme Resiliency

These are typical specifications, subject to standard manufacturing tolerances and customer options.
